

WATER MANAGEMENT POLICY

Water is critical for almost every business, whether it is a factory, farm, office or food processing facility. Using water responsibly means limiting its use when possible, minimizing the environmental impacts of water use, and properly managing waste water.

Lalan Group of Companies (Lalan Rubbers (Pvt) Ltd and Central Rubber (pvt) Ltd) is committed to:

- Protect the environment and the local community through responsible use of water resources.
- Conserve and minimize water use in all company operations and at all company sites.
- Adhere to all legal requirements regarding water use and wastewater disposal, including making sure that water is not unnecessarily polluted, contaminated, or irresponsibly handled or discharged.
- Re-use wastewater for other purposes, rather than discharging.
- Immediately respond to any incidents of accidental water contamination, damage to the environment, or unsafe discharge of water contaminants and wastewater.
- Inform the local community and stakeholders of the company's goals, objectives and progress in responsible water management.

This policy should be communicated with all managers, supervisors & workers. Regular internal monitoring and testing of water, helps to minimize high costs associated with over usage of water & impact on environment.

This policy shall be reviewed annually.
